## Editorial

After about 8 months in August 2005, I began to experience similar problems with necrosis of the femoral head even on the right hip. My Orthoped MU Dr. František Vurm, who has already operated the left hip- he recommended only hip pain pills to limit, which did not solve the essence of the orthopedic principles problem. His fundamental view was-to passively wait until the advanced necrosis of the femur destroys the right hip joint too-and then, finally to use the THA again. He did not think of any more moderate rescue carefully procedures for my hip-I suppose, probably because he did not use any nonsurgical healing processes or mild curative surgical arthroplastic processes.

Of course he did not manage them practically with skills- and perhaps He never read anything about them from the last Czech Orthopaedic Encyclopaedia since 2005. The orthopedic encyclopaedia literally describes full List of orthopedic diagnoses and full variants of treatment methods-which the unique orthopedic routine does not manage with skills and therefore cannot recommend to its patients for else orthopedic concurrency in medical Branch. If you want to make a good next profit by next hip Total Hip Arthroplasty. No professional critic from the position of his experienced colleagues-the Orthopedists, does not expect it. Especially in the elderly, it is often with much more advantageous to replicate about number about 200 TEP hip annually from the point of view of the older Orthopaedist to older Patient in the region- rather than trying to risk the easier and cheaper light surgeon repairing of the hip joint for the individual Patient-maybe which he saw similar extraordinary problems twice times about 20 years ago- when he was studying Orthopedics firstly.

All Orthopaedist are keeping mostly trendy-to more frequent the large surgeon standard HIP with Total Arthroplasty, despite there are for Patients frequently growing risks from full Anaesthesia, worse rehabilitation, more risks on the Surgeon hall, etc. The fatal legal, technical, medical mistakes of my Orthopad MU Dr. František Vurm-it was ignorance my preliminary declination the femoral neck on the right femoral bone, which was diagnosed by the Radiology from the Central Medical Radiology Clinic of the Faculty Hospital Královské Vinohrady Praha 10-about 3 weeks before Surgery THA-

it means before date November 13, 2007 in the Regional Hospital Mladá Boleslav with explicit results by written too!

By the Directive 93/42/EEC Medical Devices, there are technical requirements including mandatory duties to create "Individual Clinic Processing Plan of Surgery THA", because the individual qualities of the Forms, Positional placement and the individual structure of hip bones-there are limiting Input mandatory information about Patient Health Status including, we should probe the useable fitted placement of the choiced components set THA on the preliminary RTG Hip images with mandatory comparison with the firm radiologic etalons of components in Geometry 3 D on the Orthopedic screen, with the same scaling...there are mandatory specific planning processing by the Dysplastic Declination of femoral neck...because the separation of dysfunctional forms the natural Head of joint....must be with individual surgeon cat, there must be regards to rasping the specific socket on the proximal femoral cavity...for planning the placement of the stem...Only idiot or Murderer...could be able to begin the illegal Surgeon Work THA on the Surgeoin Hall "blendy"! Only Group of Murders with graduating as Orthoped MU Drs, could say...it is working Lege artis CZ, including when the MU Dr. František Vurm wasn't able to detect the false rasped the proximal femoral socket with false hole-with Illegal destruction integrity of my femoral bone ... despite he should been mandatory controlling by the Product in void with specific Orthopedic instrument full integrity by details in Certification of Users THA Bi Contact S No cemented, but he didn't diagnosed tragic hole in the femoral socket. When MUDr. František Vurm illegal finished the assembling the set THA-Bi contact S, No cemented, Dimension 13 mm, Type N from the B. Braun Germany... out of mandatory accuracy in coaxialties the femoral bone and their Stem....out of tolerance +/- 1 grads...when he placed the stem illegally Crum ....with declination in the sagittal Direction (the same Plain and declination of the axes of the Stem on 13, 68 grads-Direction as the Imaging RTG since the November 16, 2007)

Only Idiots or Murders could say "It is no to detect-illegal declination on the RTG since the date November 16, 2007". We should observe the post operational Image not illegally "in the hand

and with intuitive views"! We should take always the Firm installing radiological masks and on the Orthopedic screen, we should comparing the placement on the Image with this radiologic firm etalons....and when the spice of the used stem in the coordinates Xi, Yi, Zi we were controlling....by the Preliminary Planning....but there are in the FALSE DEPTH! The spice it is about 5,8 millimetres in femoral axes "virtually shorten axes of the Stem"-Only idiots or my Murders, could say again by Court dealing....it was LEGE ARTIS CZ!

No, there are by the goniometric Algorithm to evidence the same declination 13.68 Grads definitely, as we could see the same declination on the next post operational RTG Image since the date November 28, 2007 before Reoperation THA! It was Crash FAUSSE ROUTE STEM of the false illegal assembling product "CE", there were no functional mandatory abilities by official testing of implanted product "CE" on the surgery hall since date November 13, 2007!

Only idiots or my Murders could say again...."You are probable crippled by the post operational patient happened fallen, all medical orthopedic workflow were realised LEGE ARTIS CZ", by the meaning medical staff and so as by The Knowing Medical Institute-it is FALSUM and the Complot against the Patient, it was accepted by the Judge!

There are absolutely excluded to substitute the real Phenomenon's and Biomechanics, Geometry, Radiologic evidences from "Tragic Crash FAUSSE ROUTE in the surgeon Hall since date November 13, 2007-see the next 2 post operational RTG Images" and the False Medical Hypothesis from the Court Medical Message from the date March 27, 2012 from the Knowing Medical Institute-"The Central Army Hospital Prague CZ" Post operational patient Fallen with perfect Lege Artis CZ the Provider Health Care-the Regional Hospital Mladá Boleslav with medical staff-Orthopedists MUDr. František Vurm, prime MU Dr. Pavel Šedivý. The False Medical Court Message was signed by the Head of The Central Army Hospital Prague CZ-Prof. MUDr. Miroslav Zavoral DrSc., so as the Head of the Army Forensic Clinic prime MU Dr. Miloš Sokol Ph. D., No. 36 C 181/2009-123 since March 27, 2012

The mortal orthopedic injuring from the Regional Hospital Mladá Boleslav was completed by in forced extremely repeated RTG ionisation in January 2012, when the summary radiation caused me the Leukaemia B-CLL, perfect detect on the Blood parameters since October 2012 and as the mortal diagnose it was diagnosed perfect

with details in Haematology of Institute of Clinic and Experimental Medicine Prague 4, CZ from the February 2013.

In just time my orthopadic diseases are continuing with drastic limiting my locomotion abilities, with full plegic destruction of the nervous Ischiadici in my right underknee since the November 13, 2007 for ever, with in forced next reoperation THA in November 30, 2007, with many repeated annually risky patient fallen with 8 x more probable mortal repeated the breaking proximal femoral bone as I this usual in Cluster Patient with standard THA. With leukemic destructions with redundant in forced extremely ionisation-out of Court Judicial Question "IT WAS MEDICAL IMPLANTING PROCESSING LEGE ARTIS CZ?"

All my Murders are smiling me in Complot among the Culprits and Knowing Court Experts MU Drs with the worldwide famous evaluation Health care against Patients CZ, it is calling "LEGE ARTIS CZ"! There are after false illegal usage Medical Devices about 40 thousands Patients CZ needless heavy injured and mostly preliminary casual dying Antaly.

None of State Penalty Offices CZ could renewed the Penalty Court Trial against my Murders with perfect respects medical official Tittles MU Dr CZ, I have asked it since the July 2013 vainly! The Judge JU Dr. Vojtěch Cepl from the Regional Court Prague was perfect informed before Court dealing by my Criminal evidences by written in my recommended Letter since the July 17, 2012, despite the accepting of False Medical Court Message was realised officially in September 17, 2012, the false criminal argueded Judgement was derived from the false Court Medical Message as No. 36 C 181/2009-221 since September 24, 2012-"Patient post operational Unhappy, no Fausse route stem."

I was asking about Civic Legal Support for my Human Rights CZ to justified Court processing with the justified and verified Criminal evidences only by Penalty Court Trial, including asking the Ombudsman CZ about support, but It is without a like hood official Answering till today's. I have no money and no Healthy to defend my Human Rights in the European Court for Human Rights EU/CZ in the Strassbourgh, but I hope in your empathy and rational reuse to decide the Method S\_T\_A\_R\_S-Statistical Retrieval and search of sufficient information to Mass usage for repeated similar strategic decision making with risk and computer support, 21532 CZ 2010.
