Bipolar Disorder is sudden switch in moods between large periods of euphoric state (excess of positive emotions) and depressive state (excess of negative emotions). It can be accurately diagnosed with MRI showing darkness in the middle of their brain, which the doctors interpret as bipolar or addictive personality, but they don't understand that this darkness means suppressed brain activity caused by dominant negative thinking [1]. Since MRI is expensive and Psychiatric Hospitals cannot afford it, I am offering here a cheap and accurate way to diagnose bipolar disorder with electric measurements of our aura, which I found to be emotional. These measurements also allow distinguishing between bipolar disorder and irregular function of the Thyroid Gland, which have the same symptoms and are frequently misdiagnosed.

I spent almost 40 years of my life studying the aura - first photographing it. I found that at positive emotions the aura was brighter and at negative emotions it was dimmer, which meant that the aura was emotionally sensitive. To be able to measure these changes in precise numbers, I had to develop very sensitive equipment because the aura's field is 1,000 times weaker than the electromagnetic field (EMF) created by the biocurrents of the body [1]. I found that the aura field was nonlinear EMF (NEMF) because it had a line of alternating vortices and anti-vortices running along the backbone, which I could measure - they are called "chakras" in ancient Hindu sources, which means "spinning wheels" in Sanskrit.

I found that the aura's weak NEMF plays very important role in the body - it rules and regulates all the processes in the body not with its strength, but with the information it carries; and being emotional this weak informational field allows all the processes in the body to be modulated by emotions [2]. The Russian scientist Shkatov developed equipment, which allowed him to measure the spinning of the aura. He found that at positive emotions the aura span clockwise. In nonlinear physics, vortices spin clockwise and suck energy in, which would explain why we feel in high Spirit when we experience positive emotions [3].

The Russian scientist Shkatov found that at negative emotions the aura span counterclockwise. In nonlinear physics, anti-vortices spin counterclockwise and emit energy, which would explain why we feel in low Spirit when we experience negative emotions - we are losing energy [3]. All this means that the aura, which is NEMF, is our emotional Spirit. At positive emotions, we feel in high Spirit because the aura (Spirit) spins clockwise and sucks in energy and at negative emotions we feel in low Spirit because our aura (Spirit) spins counterclockwise and releases energy. Since our aura (Spirit) is NEMF, this means that

there is a reservoir of NEMF energy from which our aura (Spirit) sucks energy at positive emotions and releases energy at negative emotions. I think that this reservoir of NEMF energy is the Space Matrix (called ether in the past), from which everything material was created [4].

The fact that the Space Matrix (called ether in the past) is NEMF explains why the existence of ether was denied for so long – it is invisible and it is too weak to be measured [4]. The turbulence of our aura (Spirit), which is NEMF, is manifested with a vertical chain of alternating vortices and anti-vortices, which start at the tailbone and finish on top of the head. As said, in Hindu sources they are called “chakras”, which mean “spinning wheels” in Sanskrit. When I measured the energy of the alternating vortices and anti-vortices of the NEMF of the human aura (Spirit), I found imbalance specific for bipolar disorder.

Specific for bipolar disorder is low energy of the first (ground) chakra at the tailbone, high energy of the second (sexual) chakra (which is one inch under the belly button), and low energy of the third chakra (the chakra of the Solar Plexus, which is one inch under the rib conjunction). One very interesting finding was – the Bipolar people with very high reading of the second (sexual) chakra (very high sexual energy) were the sexual predators, which puts the sexual predators in the category of people with Bipolar Disorder. Diagnosing Bipolar Disorder through electrical measurements of the vortices and anti-vortices of the NEMF of the aura (Spirit) is not only much cheaper than MRI – it allows distinguishing Bipolar Disorder from irregular function of the Thyroid Gland, which have the same symptoms; for that reason, people with irregular function of the Thyroid Gland are frequently misdiagnosed as Bipolar.

My measurements of the aura’s NEMF showed that while Bipolar Disorder is manifested as low energy of the “ground chakra” #1, high energy of the sexual chakra #2, and low energy of the Solar Plexus chakra #3, irregular function of the Thyroid Gland is manifested as periodic changes in the energy of the Throat Chakra #5 (where the Thyroid Gland is) – the energy is abnormally high during the euphoric state and abnormally low during the depressive state. But I want to draw your attention to the fact that while our body gets its energy from food and breathing air in and out, our emotional Spirit (seen as aura), which is NEMF, gets its energy from the Space Matrix NEMF - at positive emotions it breathes in NEMF energy and at negative emotions releases NEMF energy to the Space Matrix NEMF.

If Bipolar Disorder is observed as periodic switches between large periods of euphoric state (with dominant positive emotions) followed by large depressive periods (with dominant negative emotions), this means that the normal switch positive <-> negative

emotions of normal people is stuck for a long time on only positive or only negative emotions. Major question here is: do we have power over the switch, i.e. can we control the switch of our emotions? We are here on planet Earth as emotional Spirits in material bodies to learn to control our emotions, which come with the Spirit [5]. If so, we should have power over the switch and we do.

Here is the proof of it – a young man was on alcohol and narcotic drugs because of inherited from his father dominant negative thinking. I explained to him that the root of his problem was the dominant negative thinking inherited from his father. The only way to get out of the pit (he was in) was to do his best to change his way of thinking from dominantly negative to dominantly positive – he did and became sober and drug clean [6]. It seems we are given the power over the switch. If so, bipolar individuals (with the same darkness in the middle of the brain as the addictive personalities) can become normal by working toward changing their way of thinking to be always dominantly positive.

Since our Emotional brain is in the Subconscious, we are not consciously aware of the existence of the emotional Spirit. We are also not consciously aware of the existence of Quantum Computer in the Subconscious, which operates with the waves of the Spirit [7,8]. Hypnotists discovered with surprise that their hypnotized patients with sleeping Conscious can calculate 10,000 times faster, which would be possible only if we have in the Subconscious more powerful computer than our conscious computer. We just need to unlock the treasures of our Subconscious. In the hardware of the Quantum Computer in the Subconscious, working with the waves of the Spirit, the Creator stores what he wants us to be: Loving, Forgiving, and Helping others. We need to follow them to do well.

I am sure that if the people with Bipolar Disorder start living according to what the Creator wants us to be, i.e. Loving, Forgiving, and Helping Others, they will become normal. Proof of this is the fact that when Jesus was curing bipolar individuals, he was always saying: “Go and don’t sin any more.” What is “Sin”? “Sin” is not living the way the Creator wants us to live: to Love, Forgive and Help Others. All the people, who have been in a state of clinical death, claim that the Creator is Light woven with Love. Since our Spirits are templates of the hologram of the Creator (He created us in his image) He wants us to be like Him – Loving. The teaching of Jesus was nothing else but reminder what the Creator wants us to be: Loving, Forgiving, and Helping Others - and this is in the hardware of our subconscious Quantum Computer working with the waves of our emotional Spirit.
