Opinion

- i. no “standard meter”
- ii. no “standard second”
- iii. no “standard kilogram”
- iv. no “standard charge”
- v. no valid metrology
- vi. no rebuttal of Zwicky 1929
- vii. no Big Bang
- viii. no finite age of the created universe
- ix. no multiple universes
- x. no finished black holes
- xi. no gravitational waves
- xii. no global- c field equation (yet Vikram H. Zaveri’s equations)
- xiii. no symmetric high-energy collisions anywhere in the universe
- xiv. no CERN safety to earth ever since early 2008

Proof: Einstein’s famous 1907 paper (in the *Jahrbuch*) entails a giant fourth implication: global constancy of c in the vacuum. This new fact exposes the above 14-tiered scandal.

Discussion: The list means bad luck for the planetary IQ since 1907. It forebodes darkly for humankind’s future because CERN is for 11 years busy betting all life against Einstein 1907, completed. And – apart from the Ankara and the Mumbai schools – no colleague appears ready to join forces against the reigning superstition. Would you, dear reader, care to help by spreading the news of the 14-tiered life-saving revolution?
